

traverse

Engineered simplicity.

okamura

Impossibly thin. Beautifully strong.

In today's workplace, conference rooms are challenged with shrinking size as well as the need to adapt to evolving technologies. Traverse is a collection of two conference tables defined by narrow contours that broaden office space, bringing people together beautifully.

Traverse was meticulously designed to create a profound presence. Despite its exquisitely simple design, the table places a premium on functionality through concealed technology and strong support.

Okamura's legacy of structural engineering, passion for creative materials, and signature craftsmanship unite in the Traverse Collection—recreating the conference table through engineered simplicity.

conference table

Elegant Tabletop

The table top is incredibly thin, less than 1" at its thickest point and tapering to a knife edge. With a span of up to 20 feet long, the top creates the effect of a hovering plane, in a rectangle, boat or oval shape. The support structure is also remarkably minimal—yet structurally strong enough for the top to extend well past the legs.

Integrated Technology

Integrated technology is concealed within each design, allowing for future flexibility. As technology tools advance toward wireless offices, Traverse locates power and data in its Tech Cradle—a small connective box discreetly tucked under the tabletop. Cables are hidden within the legs, ensuring a polished look and more usable space.

Design Studio

Traverse is designed by Rainlight. Rainlight is an integrated studio located in London and Los Angeles with client collaborations across North America, Europe, and Asia. More than a design practice, Rainlight discovers the needs of a changing world through cross-cultural research within their own network of experts in various market sectors. Part Laboratory, part workshop, part studio, Rainlight combines inspired design thinking with business acumen to create artefacts that enhance how people live, work, and play in the real world. rainlightstudio.com
